RESTORATION AND MAINTENANCE

MAISON LA ROCHE

Maison La Roche underwent maintenance work from January 6 to 25.

Scaffolding was erected to allow work to be carried out on the high frames of the painting gallery. The metal frames were treated to ensure their conservation.

Locksmith repairs were carried out to ensure the proper conservation of these partly original works. The scaffolding also enabled new polychrome surveys to be carried out in order to better understand the changing hues in the picture gallery.

LE CORBUSIER'S STUDIO APARTMENT

The next maintenance work at Le Corbusier's Appartement-atelier will take place during the first two weeks of February. The work will involve spot painting. The choice of colors is based on the color chart created in 2018 during the apartment's last complete restoration.

At the same time, facade restoration work continues, notably on the first floor of rue Nungesser et Coli. On the rue de la Tourelle side, scaffolding is beginning to be erected. A scientific committee has been set up by the DRAC Ile-de-France to assist in the decision-making process for this new phase of work.
